Nanoneedling is a non-invasive cosmetic treatment designed to improve skin texture, tone, and overall appearance. It uses a device with ultra-fine, silicone nano-tips to create microscopic channels in the skin. These channels help deliver serums or active ingredients deeper into the epidermis, enhancing their effectiveness. The process stimulates collagen production, improves cellular turnover, brightens and increases hydration without causing significant inflammation or downtime. Nanoneedling is suitable for most skin types and is especially effective for; mild wrinkles and fine lines, hyperpigmentation, dehydrated or dull skin, enlarged pores and uneven texture. Results can be seen after the first session, but 4–6 treatments spaced 1–4 weeks apart are typically recommended for optimal results. Nanoneedling is an excellent option for those seeking subtle skin rejuvenation without the commitment or downtime of more invasive procedures.

## MICRODERMABRASION | 30 min | 💧\$100 | ≈\$125

## KERAVIVE | \$399 - \$499

Even with all the effort we put into our skincare routines, we often forget about the skin under our hair. The scalp is its own environment, or microbiome. When not properly cleansed and nourished, it often struggles with itching, flaking, hair thinning or loss, and sometimes even complete baldness. It's estimated that 85% of men and 50% of women experience hair loss, thinning, and poor scalp health. Factors that can play a role in this include post-partum stress, hormonal imbalances, chemical damage from hair coloring or other treatments, and build-up from styling products.

Keravive uses the innovative technology of HydraFacial to deliver skincare to the scalp. It deep cleanses, exfoliates, nourishes, and hydrates to promote and support a healthier scalp. Healthy hair begins with a healthy scalp! Each treatment includes LED Red Light Therapy, scalp massage, and an exclusive take-home spray to help maintain your scalp health, which is essential for natural hair growth. Keravive can be used on an area that bothers you (such as a thinning hairline) or as a total scalp treatment.

- Healthier, fuller hair
- Non-invasive/ no downtime
- Safe and effective for all hair types (braids, extensions, locks, dyed hair and more)
